

Clarification about Salt mist and Ammonia testing

On BYD solar modules made in South Africa

To : Who might concern

Date: 10-Sep-2014

Dear Sir / Madam ,

Thanks for your interest in our Crystalline PV modules made in South Africa, which are already certified by TUV and CSA . We would like to confirm that all PV modules made in South Africa are consist of solar cells made in Taiwan, and the rest of material are the same as we used in BYD PV modules made in China. The salt mist test report – with reference no 68.290.11.011.01 is valid for modules made in South Africa as well, test according to IEC 61701 Draft D , standard 82/576/CD. The Ammonia corrosion testing report- with reference no No. 68.290.11.010.01 is also valid for BYD PV modules made in South Africa, test according to standard 82/600/NP . The relevant reports are attached to this letter.

Product type : BYDP6C-30 series, Poly Crystalline 60 cells - 245Wp/ 250wp /255wp /260wp ; BYD P6C-36 series, Poly Crystalline 72 cells – 295W,300wp, 305wp, 310Wp .
